Work experiences

Fullstack Developer - DvTech IT Solution
2020 – up to date

- Collaborated with a team of developer to work on company in-house projects like Fintech app, E-commerce app, Bus booking web & mobile app.
- Built multiple Micro-services for various apps, in which i implemented Phone & Email Authentication services to connect the in-house project to it.
- Improved in my communication skills, and how to tackle out errors or bugs. I learned how to solve bugs the quickest possible way, and how to control the pressure around a project.
- ➢ TECHNOLOGY STACKS: MONGODB, NODEJS, REACT/NEXTJS, YARN/NPM, FIREBASE, CHAKRA-UI, CSS, FLUTTER, STYLED-COMPONENT, AXIOS, GETXCLI.

Front-end Developer - BickDrims LLC
2018 – early 2020

- Worked as a front-end developer, i was in charge of converting XD designs to real world Web & Mobile applications.
- Succeeded in working hand to hand with the back-end team to sort out the state management, data flow & UX part of the different projects i worked on them.
- Learned how to collaborate with different team of developers on GitHub, in which i had to create pull request, push and CI/CD pipelines to our servers.
- ➢ TECHNOLOGY STACKS: MONGODB, NODEJS, REACT/NEXTJS, YARN/NPM, FIREBASE, CHAKRA-UI, CSS, FLUTTER.

Side projects

FinTech App
2022

This app helps customers purchase Airtime, Internet Bundle, Pay Bills, and more. The app was built using **Flutter,** and the UI components were taken from some inspirational websites like Dribble & Pinterest.

Financial Tracking App
2020

This app organizes your finances into both Incomes and Expenditures, added to it is the categorizes source of Income and expenditure. A user can as well add an expense or Income just by sending a voice command into the app and it will add the data to the DB, then populate it to the user interface

Cleaning Service Web And Mobile App (BickDrims)
2019

Developed a comprehensive cleaning service mobile and web app utilizing React Native and React for cross-platform functionality. Features include user profiles, booking management, real-time tracking, payment integration, ratings, and feedback. Designed an intuitive UI/UX for seamless customer experience and efficient service management for cleaners.

Education
Degree In Computer Science
At IMIT University
2018 – 2020

Level 500 ABMA Certification(UK)
London Institute Of Management & Information Technology University.
